

## Triton Stormwater Solutions

Hereby Certifies that the Triton Chamber and End Cap  
Products are:

- 1). Lab tested to the ASTM-F2418-05 spec and are field tested to the AASHTO LFRD Bridge Design Spec 1 by a third party test facility.
- 2). The Triton products are manufactured in an ISO/TS 16949-2002 and ISO 14001:2004 certified facility.
- 3). All materials used have a life expectancy of over 100 years.
- 4). The Chamber products all have a load rating of H-30 and HS-30 (This means that the chambers when installed according to the Triton install manual is able to support a single axle load of 48,000 pounds)
- 5). Each product has a date wheel indicator that provides traceability from date of production to the date of the material formulation.
