

Triton Stormwater Solutions provides Storm Water Management Solution for:

Following an evaluation from the New Products CoP Group Waste team of Severn Trent the stormwater management system by Triton Stormwater Solutions has been approved for use within Severn Trent on both AMP 6 Capital Projects and Developer Sites.

The first project to be undertaken with Severn Trent was Radleigh Homes latest development of a 20 new dwellings in

Awsworth, in the Broxtowe district of Nottinghamshire. The Triton system was designed to attenuate up to the 1:30 year return storm event providing 60m³ of stormwater storage.

The system was installed by Bridgebank Limited, on behalf of Radleigh Homes, and took only two days to install from excavation.

David Cleveley Managing Director of Triton Stormwater Solutions UK limited 'Triton is the next generation of Stormwater Management System, providing a maintainable, stronger and cost effective solution with a longer life. It is a great accolade for Triton to be recognised by one of the UK's largest Water Authorities. We are looking forward to providing the Severn Trent team and it's customers with storm water management solutions for future sites throughout the region.
